PROFESSIONAL SUMMARY

Flutter Developer building and shipping production mobile applications with Dart and Flutter. Delivered 8 applications live on the App Store and Google Play across government / enterprise platforms, heritage commerce, service marketplaces, multi-store e-commerce, delivery, restaurant ordering, and travel.

Work primarily with Bloc / Cubit and the MVVM pattern, following SOLID principles and clean, reusable, modular code — integrating RESTful APIs through Dio / HTTP with structured error handling.

Experienced in multi-role applications — including a five-role government workflow driven by a Finite State Machine — real-time data synchronization and live tracking, Firebase push notifications and messaging, Google Maps & Geolocator, enterprise media uploads, and Arabic / English (RTL) interfaces.

TECHNICAL SKILLS

Languages & Frameworks: Dart, Flutter Framework, Advanced & Responsive UI

Architecture & Patterns: MVVM, SOLID Principles, OOP, Clean Code, Reusable Code & Modules

State Management: Bloc, Cubit, Finite State Machine

Networking & Data: RESTful APIs, Dio, HTTP, Error Handling

Firebase: Push Notifications, Firebase Cloud Messaging, Real-time Data Synchronization

Maps & Location: Google Maps API, Geolocator, Real-time Location & Delivery Tracking

Media: Document, Photo & Video Uploads, Audio Playback

UI & Localization: flutter_screenutil, Responsive Design, Multi-Role UI, Arabic / English (RTL)

Tools: Git, GitHub, Android Studio, VS Code, Xcode, Postman, Figma, Adobe XD

WORK EXPERIENCE

Flutter Developer — Efadh For Web Solution

Dec 2024 – Present

Full-time — Mansoura, Egypt

- Deliver production Flutter applications for iOS and Android — 8 of them live on the App Store and Google Play, including AdEC Request, Al Sadu Al Najdi, Almustarih, Alaswak, Makhdom, and Wasal.
- Built a large-scale platform for the Roads General Authority (RGA, Saudi Arabia) with a Bloc + Finite State Machine request lifecycle across five user roles.
- Build multi-role applications (clients / drivers / service centres, customers / providers) with distinct flows on a shared architecture.
- Integrate RESTful APIs with Dio / HTTP and model every screen state explicitly with Bloc / Cubit.
- Implement real-time features — live order and delivery tracking on Google Maps, in-app messaging, and Firebase push notifications.
- Build responsive, Arabic-first RTL interfaces with ScreenUtil while keeping code clean, reusable, and SOLID.

EDUCATION

Mansoura University

2021 – 2025

Bachelor of Science, Computer Science

LANGUAGES

Arabic (Native) • English

SELECTED PROJECTS

Applications live on the App Store and Google Play.

ADEC REQUEST — Enterprise / GovTech (RGA, Saudi Arabia)

Efadh For Web Solution

Live on [App Store](#) & [Google Play](#) • Case study: flutterion-portfolio.vercel.app/projects/adeq-request

- Developed a large-scale application connecting contractors, consultants, engineers, and administrative branches in one system for engineering requests and project inspections.
- Implemented a multi-role workflow using Bloc and a Finite State Machine to manage complex request lifecycles across five user roles.
- Built geolocated field inspections (Google Maps, Geolocator), enterprise media uploads, and Firebase push notifications.

AL SADU AL NAJDI (السدو النجدي) — Heritage Commerce

Efadh For Web Solution

Live on [App Store](#) & [Google Play](#) • Case study: flutterion-portfolio.vercel.app/projects/elsdo

- Built an Arabic-first marketplace for authentic Najdi Sadu weaving, unifying training workshops, cultural activities, and a handcrafted-products store in one home hub.
- Implemented workshop discovery and booking with location-aware listings and category filters.
- Built a categorised store with product details, checkout, order tracking, and push notifications.

ALMUSTARIH — Auto-Parts & Car-Service Marketplace

Efadh For Web Solution

Live on [App Store](#) & [Google Play](#) • Case study: flutterion-portfolio.vercel.app/projects/almustarih

- Developed a marketplace connecting car owners, spare-parts vendors, and service workshops.
- Built a multi-role system for clients, drivers, and service centres with Bloc and Dio.
- Implemented live delivery tracking on Google Maps, in-app messaging, and push notifications.

ALASWAK — Multi-Store E-commerce

Efadh For Web Solution

Live on [App Store](#) & [Google Play](#) • Case study: flutterion-portfolio.vercel.app/projects/alaswak

- Brought electronics stores, restaurants, and cafés into one app with a shared catalogue and checkout flow.
- Implemented smart product suggestions, a streamlined checkout, and real-time order tracking.

MAKHDOM — On-Demand Services

Efadh For Web Solution

Live on [App Store](#) & [Google Play](#) • Case study: flutterion-portfolio.vercel.app/projects/makhdom

- Developed an app connecting customers with professional technicians for daily services.
- Built quick service requests, provider matching, and in-app customer-provider interaction.

WASAL (واصل) — Delivery

Efadh For Web Solution

Live on [App Store](#) & [Google Play](#) • Case study: flutterion-portfolio.vercel.app/projects/wasal

- Built a lightweight delivery app connecting customers with couriers for meals and store items.
- Implemented full authentication and real-time order tracking through to doorstep delivery.

NAJI AL-HARBI RESTAURANTS (مطاعم ناجي الحربي) — Restaurant Ordering

Efadh For Web Solution

Live on [App Store](#) & [Google Play](#) • Case study: flutterion-portfolio.vercel.app/projects/naji-restaurant

- Built a branded mobile ordering app for a heritage kebab restaurant serving its authentic taste since 1951.
- Implemented menu browsing and a short, familiar ordering flow that carries the restaurant's visual identity.

PLAN A — Travel & Visa Services

Efadh For Web Solution

Live on [Google Play](#) • Case study: flutterion-portfolio.vercel.app/projects/plan-a

- Built a smart travel companion that makes visa applications and passport renewals simple, clear, and stress-free.
- Implemented guided, step-by-step requirement flows that take travellers from planning through to approval.
